

DEVICES AND PRODUCTS FOR PEST CHASING AND EXTERMINATING

ULTRASONIC PEST CHASERS

Ultrasonic pestchaser emit high frequency ~~ultrasonic~~ sound waves between 32 and 62 kHz to create an acoustically hostile environment that repels rodents from sound-protected rooms. It's kinder ~~than~~, ~~trafer~~ than poisons, and completely inaudible to people and non-rodent pets. ~~Unlike~~ and poisons, ~~these~~ Chaser minimizes human contact with disease-bearing rodents (no dead rodents to dispose of). Ultrasonic sound is a frequency too high to be ~~heard~~ human ear. People can hear sound ranging from 20 to 20000 Hz. ~~These~~ Chaser is designed to continually and automatically sweep an ~~ultrasonic~~ frequency range between 32 and 62 kHz, well ~~above~~ the hearing range of human and common pets (cats, dogs, birds). ~~High~~ frequencies and some other pests can clearly hear these frequencies. ~~High~~ Antennae the sound can induce auditory stress. ~~In~~ complexity and changing frequencies ~~prevent~~ rodents from getting used to the sound.

Rats and mice chasers

PestStop 500

Ul trasonični rasterivač(4 kom.)

Pe stClear (van objekta)

MPR10 Ultra Magnetic Pest Repeller

- The MPR10 works by ~~transmitting~~ a pulse through the electrical ~~that~~ exists around the electrical wiring ~~building~~
- The pulse irritates the nervous system of the rodents causing them discomfort encouraging them to ~~leave~~ the proper looking for somewhere more comfortable to live
- One device will ~~cover~~ up to 2500 sq. ft. or plug one device ~~one~~ ~~each~~ larger properties

Pest Stop 500

- New design for mice or insects
- Suitable for use in a single room
- Pest Stop 500 is safe to use near children & does not ~~pset~~ cats or dogs

Ultrasonic Pest Repeller 4 Pack

- Each one ~~covers~~ 400 - 500 sq. ft.
- 4 pack for complete home protection 24 hours a da
- Continuous output ~~at~~ 108 dB at frequencies too high for people, cats or dogs hear

PestClear Indoor - By combining two pest control systems, electromagnetic interference and ultrasonic sound, PestClear provides the most powerful protection available.

- Unwanted pests leave after an average of two weeks
- One unit covers average size house
- When switched to the mosquito setting, the PestClear 2000 emits a high frequency sound designed to repel mosquitoes.
- This device will not affect computers, faxes, television or microwave equipment

Very effective - against 'creepy crawlies' including cockroaches, mice, woodlice, ants and other rodents - ideal for homes, offices, factories and restaurants

Totally safe - PestClear uses no chemicals or hormones - harmless to children, pets and electrical appliances.

Pest-Stop Professional High Powered Pest Repeller

- Ultrasonic & Electromagnetic

device. Covers up to 3000 sq ft.

- Chemicals free!
- New design with separate settings for rats, spiders, ants & creepy crawlies & mosquitoes.

PestClear Outdoor - This unit can be used on 4 x D cell batteries (not supplied) or on mains with the optional power supply unit. Batteries will last up to 4 months as the unit uses its PIR detector to detect pests; when used on mains its output is continuously on constantly changing.

- Separate settings for different pests: cats, squirrels, rabbits, dogs, badgers, etc.
- Covers an area up to 70 feet x 50 feet (depending on conditions)
- Does not affect birds or fish

This unit must be mounted with clear line of sight of the problem objects in the way, even dense foliage, will block the sound and diminish the deterrent effect.

WK0300

WK0051

WK0675

WK0523

- Chases: mice, rats, ticks, spiders, crawling insects
- Protects up to 45m²
- European plug (220V)
- Visible results after 72 hours

WK0180

- Chases: mice, rats, ticks, spiders, crawling insects
- Protects up to 90m²
- Direct-plug-in 220V
- Visible results after 72 hours

WK0220

- Chases: mice, rats, ticks, spiders, crawling insects
- Protects up to 135m²
- Adaptor 220V included- Visible results after 72 hours

WK0240

- Chases: mice, rats, ticks, spiders, crawling insects
- Protects up to 60m²
- Battery operated (4 x 'C')
- Visible results after 72 hours

WK0300

- Chases: mice, rats, ticks, spiders, crawling insects
- Protects up to 280m²
- Adaptor 220V included
- Two loudspeakers
- Visible results after 72 hours and two weeks for rats

WK0051

- Chases: cats, martens, dogs, etc
- Protects up to 200m²
- Required 4 'D' batteries
- 7 variable ultrasonic frequencies
- Angle of infraction detection: 90 degrees
- Detection up to 15 meters

ARHIFARM team performs **bird control** with:

- 1) Bird Chaser
- 2) Repellent substances
- 3) Electric protection with special carriers of wires of high voltage machines.
- 4) Needle protection
- 5) Net protection

Bird Chaser

- Working on a principle emits owl sounds in one of two ways- either at timed intervals or only when a motion detector triggers the signal.
- The timer can be set in adjustable periods anywhere from five to thirty minutes. The motion detector will be triggered whenever movement is sensed in a 130 degree arc for up to 20 feet. The unit shuts down automatically at night, ensuring it is not bothered while you sleep
- Sounds of hawks, eagle, falcon, and owls which scare rats and mice.

Animal Away

- Complete pest control for dogs and cats. It uses high-pitched sound frequencies to deter animals from your yard, garden, garbage and gardens. While the sounds are not audible to humans, animals find the signal uncomfortable and will leave your property in search of more peaceful surroundings. Uses a motion detector and has an arc of 70 degrees and works for a distance of 30 feet.

Super Sonic Molechaser

Works in two modes:

SuperSonic mode - The unit emits a powerful sound perfect for dealing with mole infestations.

Long Life mode - Yields an extended battery life of 12 months and is ideal for maintaining your yard.

EXOROACH

- Offers a simple chemical free catching mechanism.
- Sensing the food lure tablet, they will be attracted into the trap. On entering, they climb up onto the specially designed bridge treated with Entostat™ powder. The particles of Entostat cling to the cockroach feet and segments, preventing them from maintaining a strong grip and causing them to fall onto the glue board below from which they cannot escape.
- The size of Exoroach is 39 x 22 x 6.5mm, the ideal proportions to catch and retain a greater number of cockroaches between inspections.
- The Exoroach Trap will provide many months of use if glue boards, lure tablet and bridge are regularly replaced.

Mole repeller WK0675

- Chases: moles, underground rodents
- Protects up to 100m2
- Required 4 'D' batteries
- Sequential sound level up to 125 dB
- Installs existing holes and mounds

Electric Rat-Zappers

Rat Zapper Ultra Battle Station includes 5 zappers, 5 AC Backs, 5 Radio Transmitters, and 1 Zapperack Monitor Panel.

NEW!!!

Products for rodent extermination without poisons

EradiRat and EradiMouse are revolutionary products for rodent control.

Digestive tract of rodents has a unique system of absorption regulated by complex mechanism. EradiRat and EradiMouse physically disable that mechanism and rodents become slow before death typically rats die after 4-5 days and mice after 2-3, after regularly taking. It is safe to use on rabbits and animals on farms and people when following the instructions.

Products are made of natural plant extracts and effect on digestive tract of rodents. Gmules are biodegradable, they do not contain which contaminate the environment.
